Senior Mobile Engineer | Flutter & Node.js | 4+ Years | 1M+ App Downloads | 5+ Production Apps Shipped

Mobile Engineer specializing in Flutter and Node.js, building scalable, production-grade applications with 1M+ cumulative downloads.
Proven track record of improving retention, stability, and performance.

Experience

Fyva

May 2025 – Present

Senior Software Developer

Bengaluru, India

- **Built** and launched a cross-platform e-commerce app using Flutter (Android, iOS), integrating Shopify Storefront APIs across end-to-end flows (browse, cart, checkout, authentication).
- **Optimised Shopify Storefront GraphQL API performance** by reducing response latency by 20% using response caching, efficient GraphQL queries, and cursor-based pagination.
- **Increased checkout conversion by 15–20%** by building a user behavior analytics pipeline to identify drop-offs and drive A/B-tested UI improvements.
- **Integrated AI-powered product similarity recommendations** into the Flutter application, enhancing cross-sell relevance and improving the add-to-cart experience.
- **Fyva App:** 🍏 App Store ➤ Play Store

Anarus INC

July 2024 – May 2025

Software Developer

Minnesota, United States

- Worked on the Ari Supply e-commerce app, improving user retention, stability, and release quality through **AI-driven recommendations** tailored to individual browsing and purchase behavior.
- Optimized API handling and state management, reducing app **crashes by 10%** and improving overall stability.
- **Maintained zero critical post-launch defects** across bi-weekly releases by establishing a pre-flight QA checklist and automated widget regression tests.
- **Ari Supply App:** 🍏 App Store ➤ Play Store

Jploft Solutions

July 2023 – July 2024

Senior Flutter Developer

Jaipur, India

- **Led full-cycle development of Food Club**, a complete food delivery platform (consumer + delivery partner apps), cutting average order-placement time by 30% through optimised flow design and real-time order tracking.
- **Built and launched Marg**, an AI travel itinerary app that uses device GPS and available time windows to generate personalized destination plans.
- Designed and implemented **scalable app architecture**, enabling faster feature development and easier maintenance.
- **Food Club:** 🍏 User App 🍏 Delivery Partner • **Marg App:** ➤ Play Store

OMG Group

April 2022 – June 2023

Flutter Developer

Bengaluru, India

- **Built WinkWack**, a matchmaking app with swipe-based discovery, real-time chat via Firebase Firestore, and profile management.
- Designed a **push notification system** for matches, messages, and activity updates, increasing user engagement.
- **Expanded addressable user base** by implementing Flutter I18n to support 3+ languages, increasing organic installs from non-English markets by 20%.
- **WinkWack:** ➤ Play Store

Projects

Home Workout App

- **Independently designed, developed, and shipped** a fitness app accumulating **50K+** downloads and **5,000 daily active users**.
- **Monetized via AdMob and in-app purchases**, generating consistent passive revenue with a maintained **4.3+ Play Store rating** over 12+ months post-launch.
- **Maintained a 99%+ crash-free rate** by integrating Firebase Crashlytics from day one and resolving P1 issues within 24 hours.
- **Home workout:** ➤ Play Store

Skills

Core Languages & Frameworks: Flutter, Dart, JavaScript, Node.js, Express.js, C++

State Architecture: Provider, Riverpod, Clean Architecture

Backend Cloud: Firebase (Firestore, Auth, FCM, Crashlytics), MongoDB, REST APIs, Shopify Storefront API

Tools Workflow: Git, GitHub, Postman, Figma, Android Studio, Xcode

Distribution Analytics: Play Store, App Store, AdMob, In-App Purchases, Firebase Analytics

Education

Shri Shankaracharya Technical Campus

July 2018 - July 2022

Bachelor of Technology in Computer Science (GPA: 8.2 / 10.00)

Durg, Chhattisgarh
